Message From Our CEO

The positive COVID-19 fragments in the Apollo Bay waste water samples continue to be a focus for Great Ocean Road Health.

There have now been three positive waste water tests in a row, meaning it is likely there is someone in the community who is recovering from COVID-19 or possibly someone who is positive and has mild symptoms and is unaware.

Therefore, we are urging anyone with the mildest of symptoms to come forward and get tested. Otway Health is a listed testing site and provides swabbing for COVID-19, 7 days a week from 9am to 4pm.

Sincere thanks to the Apollo Bay Golf Club and Damien Carney for all his help. The Otway Coastal Committee, The Colac Otway Shire, Go Traffic Management and all who assisted in the past week with the set up and operation of the drive through testing clinic at the Apollo Bay Golf Club.

We have performed over 180 swabs since the first positive waste water result was received on the 5th of September, all are negative to date.

Thanks to the community who have come forward to be tested, it is very much appreciated.

Sandy Chamberlin.
